Rocky City Swimming Club

Friday, 22 January 2010

Dear Julie,

Thank you for your club's letter.

Management is in complete agreement with your suggestions and had it been possible, these results would have been placed upon our website much sooner.

Unfortunately, my request that SQ forward a meet backup of the State Championships on completion of the meet [when results could have been acknowledged almost immediately] was not acted upon and the meet backup was not received until the 2nd January, 2010.

It arrived at a time when the association was preparing for the 2010 Sprint Meet on the 9th of January and then addressing other association matters subsequent to the sprint meet.

At the same time, this office has been engaged in numerous matters relating to CQ Championship preparations.

To say it has been a busy time is an understatement of what has been happening during January.

The pdf file and TM results that SQ had posted to their website are not user friendly for the association's needs and having posted some incorrect information in 2008, it was considered prudent to wait until results could be readily identified by the MM Backup of the State Championships.

Your suggestion; for individual clubs to forward a report summary of their results from future Queensland Championship is welcomed and will assist this office to publish swimmer results as soon as possible after the event.

Please advise your members that now, with more time available, a summary of results for 2009 State championships will be posted to the CQ website.
